[a] The figures for 1841, as published in *Gazette*, are full of errors which cannot now be corrected, and should therefore be used with great caution.

[b] The figures (Persons) for 1847 include 2246 military, women, and children; also 3739 male convicts on public works.

[c] " " 1851 " 953 " " " " 568 convicts, sex not distinguished.

[d] " " 1857 " 630 " " "

[e] The discrepancy in the number of brick and stone houses in 1870 and 1881 arises from a large number of residents in country districts failing to give definite descriptions.

[Compiled by Government Statistician from Returns supplied by the Customs Department.]

* The corresponding numbers to and from, as ascertained by the Customs Departments of the various States, are so utterly irreconcilable that it has been deemed more desirable to take the departures as ascertained by our own Customs Department than to base the statement of migration upon the compilations prepared at State and Foreign ports of arrival or departure. Owing, however, to the completely insular character of Tasmania as a State, conclusions drawn in respec of increase or decrease to population are less liable to error than similar conclusions drawn in respect of each State of Continental Australia. As regards migration seaward, it must be borne in mind that it is more than probable that the figures given independently by each State are equally and indefinitely erroneous within certain limits, and therefore it is unwise to assume that the differences shown between the statements of two States afford any reliable index to either the extent or direction of the divergence from the truth.

† Estimated to be understated by about 13·45 per cent.

* The maximum rate appears only to have prevailed in Districts chiefly Urban or Pastoral, where it may be supposed there was greater scarcity of agricultural labour. There is sometimes great difficulty in fixing the prevailing rate in Districts where few individuals of the particular class are employed and the several trades not employing any hands. † With rations. ‡ Without board. § Mowing principally by machinery, contract prices.

* Worked under Miners' Rights. † Cannot be specified.

[There being no Statistical Staff connected with the Mining Department in Tasmania, as in the neighbouring Colonies, the figures have been kindly supplied by the Collectors of Agricultural Statistics. As some of the mines are only partially worked during the year, and many mining companies are unregistered, it is difficult to obtain anything approaching accurate information. Tin is worked alluvially and in lode, so that a correct division cannot be obtained. These figures must therefore be regarded as roughly approximate.]

TRADES, MANUFACTORIES, AND OTHER INDUSTRIES.

WITH regard to the following industries, the aggregates are alone given, as it would not be desirable to localise information to Districts, thereby in many cases unnecessarily disclosing the extent of the business of private individuals or companies, as the case may be.

Unfortunately, the figures given by some establishments in respect of capital invested vary greatly year by year; such figures can therefore be only regarded as rough approximates

APPENDIX B. TO STATISTICS FOR 1901.

AUSTRALASIAN STATISTICS, 1901.

AUSTRALASIAN STATISTICS, 1901.

THE tables of Australasian Statistics which follow these introductory observations on the Progress of Australasia have been carefully compiled from Returns furnished by the Governments of the various Colonies. The general tables for each Colony contain a large amount of information conveniently arranged for reference and comparison. Additional tables have also been added for the purpose of giving fuller information on the important matters relating to Finance, Public Debt, Railways, and External Trade.

Progress of Australasia since 1830.

The following table has been specially prepared to show the general progress of Australasia over a longer period than that shown in the fuller tables restricted to recent years. The particulars selected are shown, as far as can be obtained, for the year closing each decade since the year 1830, and convey a bird's-eye view of the rapid progress made over the seventy-one years ending with the year 1901. The Annual Rate of Progress since 1850 and during the last decade are given side by side to mark the varying rate of progress in later years as contrasted with that for the greater period.

* Customs and Excise. The effect of the Commonwealth Uniform Tariff, which came into operation on the 9th October, 1901, has been felt by the several States for periods of the financial year, as follows :—New South Wales, Queensland, South Australia, Western Australia, nine months; Tasmania, three months; in Victoria the financial year ended 30th June, 1901, is free from its effect. The Western Australia figures include Intercolonial Duties.

Victoria (1). Figures are for the financial year ended 30th June, 1901, but have been treated as though the Revenues and Expenditures on account of transferred services had been received and disbursed by the Commonwealth during the whole year.

South Australia (1). Figures compiled from Report of Commissioner of Audit on Treasurer's Financial Statement for the year ended 30th June, 1902.

(2). An amount of £10,067 on account of Defences, expended by the State, has been included in Commonwealth Expenditure, thus reducing the Commonwealth Surplus returnable by this amount.

Tasmania (1). The Revenues and Expenditures on account of Post and Telegraphs and Defences received and disbursed by the State during two months of the year have been included in Commonwealth Revenue and Expenditure.

New Zealand (1) For the sake of ready comparison, the plan of analysis of Revenue applied to the Commonwealth States, has been extended to New Zealand.

* NOTE.—As the Loans actually expended on Railways include a considerable amount for Lines not open for traffic, the percentage proportion to capital will be somewhat less than what it would be if reckoned in relation to *Capital expended on Lines open for traffic* only. The net burden on General Revenue, however, is more correctly indicated by the method adopted.
